SUMMARY

Lead Full-Stack Developer shipping production React, TypeScript, and the systems behind them — with technical product management folded into the role at Circadence: roadmap ownership, delivery, and cross-team coordination. AI-powered product development, human-centered design background, Certified ScrumMaster.

EXPERIENCE

Technical Product Manager · Circadence Sep 2025 – Present

React · TypeScript · Full-Stack Development · AI/LLM · Roadmap Ownership

- Build LLM-powered web tools that speed up threat analysis and incident response for cybersecurity professionals — full-stack delivery as IC (React, TypeScript) while also owning product strategy and roadmap for the team
- Rebuilt delivery infrastructure: consolidated 409 backlog items into 10 structured Linear projects, established the first reliable sprint cadence and retro process
- Primary technical counterpart for the NTT Data Japan enterprise partnership, coordinating across two software teams and a hardware team toward the June 2026 deliverable
- Introduced AI-augmented engineering practices: Claude Code in grooming, MCP tooling for roadmaps, shared agent configs across the team

Sr. React Developer · Starbucks Feb 2024 – Sep 2025

TypeScript · React · GraphQL · Apollo Client

- Developed message reply and edit features with TypeScript, React, and GraphQL
- Upgraded UI libraries raising Lighthouse performance score from 65 to 90
- Collaborated across teams on a new web application for store managers and developed Agile processes

Senior Software Engineer · StellarFi May 2023 – Jan 2024

TypeScript · React · API Development · E2E Testing

Company-wide layoff, not performance.

- Pair-programmed an API and UI table with my manager to show users how their monthly membership payments were being reported to credit bureaus
- Created a new design system for a brand refresh, driving 100 new users per week improvement
- Built an E2E testing framework that uncovered two major regression bugs in the production account-creation flow
- Initiated and facilitated bi-weekly retrospectives for the engineering team, leading to a documentation-focused sprint and broader process improvements

Software Engineer · Sana Benefits Oct 2022 – Feb 2023

React · Jest · SASS · Ruby on Rails

Company-wide layoff, not performance.

- Built healthcare plan selection feature for members
- Acted as Agile Coach teaching Scrum practices to the team
- Created standardized testing process improving code reliability

Senior Software Engineer · Purple Nov 2020 – Sep 2022

Vue.js · React · Redux · SASS · Docker · AWS · Commerce Tools

- Built multi-million dollar sale promotions powering major revenue events using Vue.js, YAML, SASS, Docker, and AWS
- Created the order-history feature with React, Redux, a custom REST microservice, Commerce Tools, and AWS Cognito as part of a larger Purple customer-accounts initiative
- Developed A/B tests for the cart checkout flow with React, Redux, and the Google Places API, lifting test coverage across the codebase by 40% using Jest and React Testing Library

Software Engineer II · The Regis Company · Nov 2017 – Nov 2020

React · Python · MobX

- Contributed to a SPA powering award-winning corporate learning experiences alongside a small cross-disciplinary startup team
- Integrated a new Python API that cut project load times from 6 seconds to 500ms
- Met with clients alongside product owners to refine technical user requirements, reducing project scopes by 30% as measured by Agile story points
- Used my UX background to bridge UX, Dev, and Product teams, driving a 20% productivity increase as measured by burndown charts

EARLIER EXPERIENCE

Web Developer (Contract) · Charter Communications · Jul 2017 – Nov 2017

Freelance Designer · Freelance Designer · Jan 2017 – Jul 2017

UI/UX Software Engineering Intern · Gogo Business Aviation · May 2016 – Aug 2016

UI/UX Developer · Lab for Playful Computation · Sep 2015 – May 2017

Technical Support · CU Boulder IT / MCDB · Sep 2014 – Apr 2016

SKILLS

Frontend	React, TypeScript, Next.js, Vue.js, GraphQL, Redux, HTML/CSS, SASS, Tailwind CSS
Backend	Node.js, Python, Django, Ruby on Rails
Tools & Infrastructure	Docker, AWS, Git, Jest, Cypress, Webpack
Practices	Agile/Scrum, Product Design, UI/UX, E2E Testing, AI/LLM Integration

EDUCATION

B.S. Computer Science — Human Centered Computing · University of Colorado Boulder · 2014 – 2017

Minor in Technology, Arts, and Media (ATLAS Institute)

A.S. · Front Range Community College · 2012 – 2014

CERTIFICATIONS & TRAINING

Certified ScrumMaster (CSM) · Scrum Alliance · Oct 2020

Agile Training · Mountain Goat Software (Mike Cohn)
